

# Challenge UTAC

**ECE Paris**

**Open test : Collision avoidance**

# Table of contents

- 1- Team presentation
- 2- Context
- 3- Goals
- 4- Initial condition
- 5- Conception
- 6- Development
- 7- Results
- 8- Final state
- 9- Perspectives

**Guy MBOSSO MBOSSO** - Embedded systems student

**Jae Yun JUN KIM** - Mentor

**Naila BOUCHEMAL** - Mentor

**Olivier CHESNAIS** - Supervisor

**Luc BOURGEOIS** - Expert

**Rate of rear collision is around 29%**

**Project for road security**

**Autonomous vehicle and security**

- **Create a simulation environment to simulate a sudden braking situation**
- **Design an automatic braking system to avoid a collision when braking hard.**
- **Measure vehicle reaction time under different conditions**
- **Speed control recommendation system, considering vehicle speeds, inter-vehicular distance, and weather conditions**

**This project has not inherited any previous work.**

## Information research

Safety distance

Coulomb friction

Speed limitation

## Reaction time

$$Tr1 = T2 - T1$$

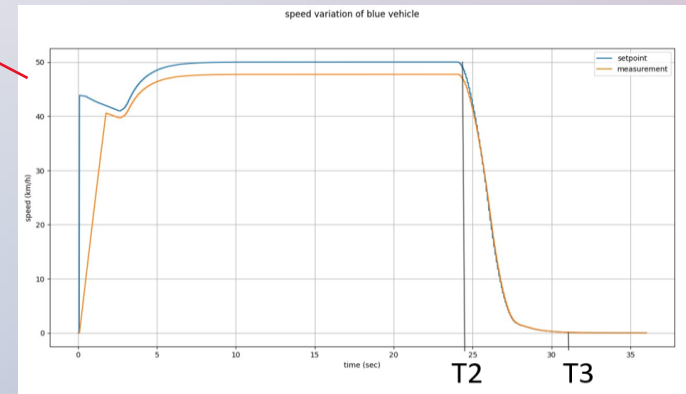

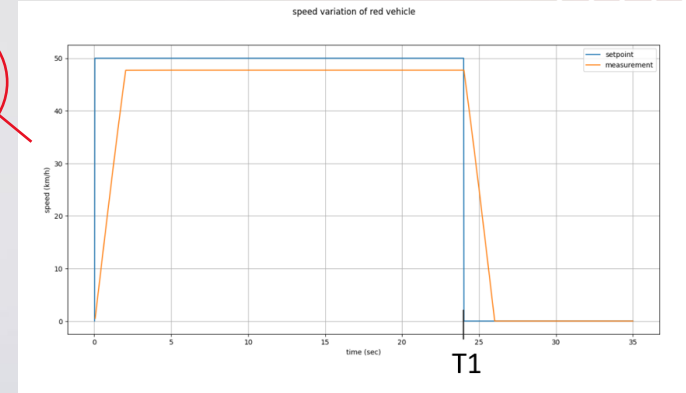

$$Tr2 = T3 - T2$$

## Control law

$$V_{\text{control}} = V_{\text{initial}} - k_p \cdot (D - d_{\text{measured}})$$

## Braking condition

$$d_{\text{measured}} < \frac{\text{safety distance}}{2}$$

## Tools

- Webots
- Lidar SICK LMS 291
- Python
- ODE (Open Dynamic Engine)

## Lidar characteristics

1 layer lidar

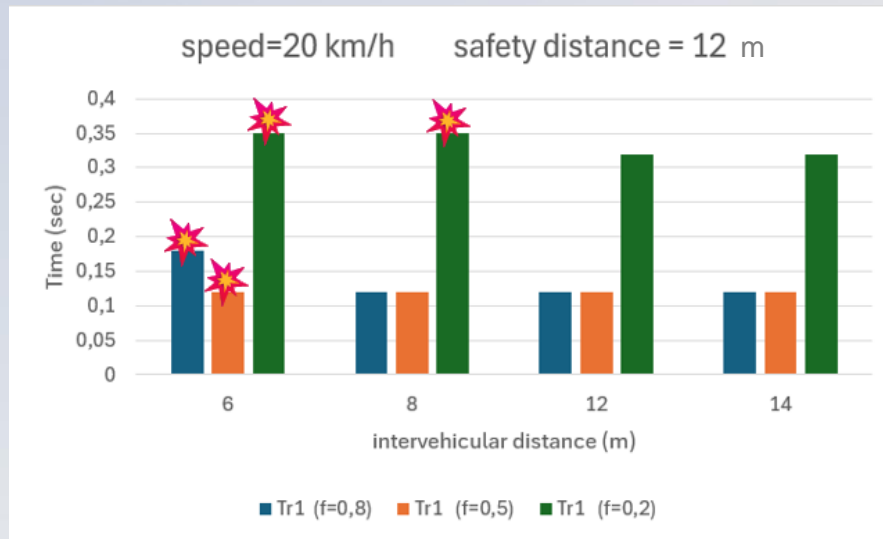

Range: up to 80 m

View: up to 180 degrees

## Tr1 measurement

## Tr2 measurement

★ : Collision

■ : f = 0,8

■ : f = 0,5

■ : f = 0,2

## Tr1 measurement

## Tr2 measurement

★ : Collision

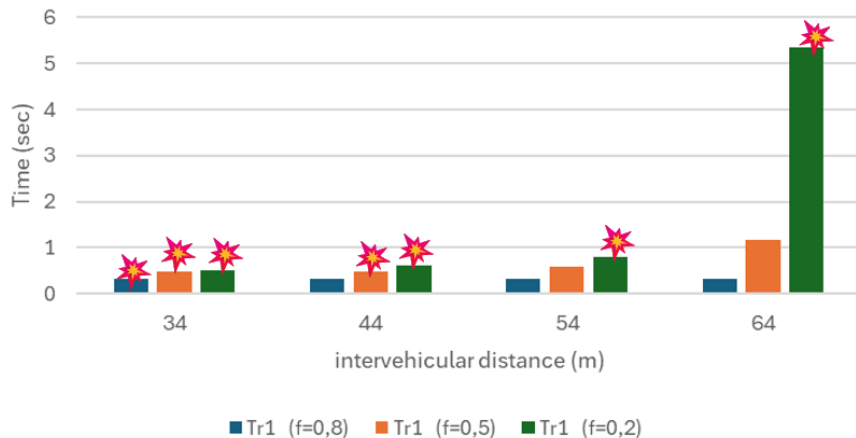

■ : f = 0,8

■ : f = 0,5

■ : f = 0,2

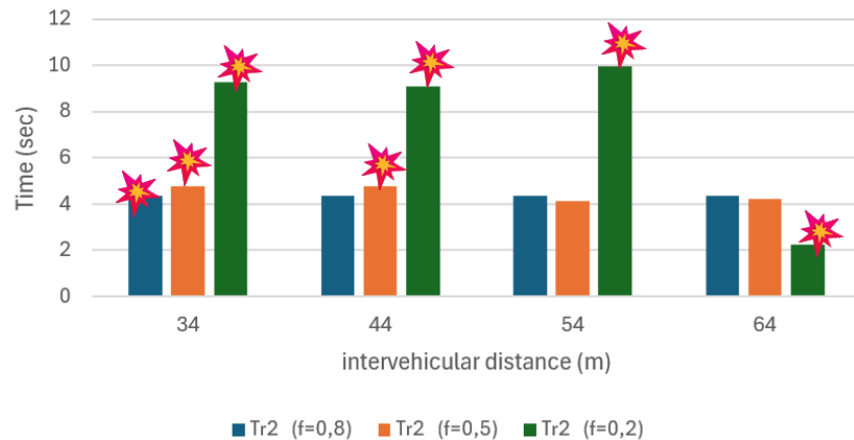

## Tr1 measurement

speed=90 km/h safety distance=54 m

## Tr2 measurement

speed=90 km/h safety distance=54 m

★ : Collision

■ : f = 0,8

■ : f = 0,5

■ : f = 0,2

- **Simulation allowing to observe a braking scenario in various conditions**
- **Measurement of vehicle reaction time under different conditions**
- **Functional automatic braking system**
- **Recommendation system for autonomous vehicles**

- **Improving vehicle perception**
- **Consider other scenarios, such as changing lanes**
- **Use of more sophisticated controllers**

**Thank you !**
